

AUGER BITS HANDHELD/ SCOTCH SCREW-EYED

For use on softwood and European hardwoods such as oak, beech, cherry etc. The rounded single spur of these bits cut a clean edge of the hole and the chisel like cutting edge turns around the threaded centre and removes chips within the previously cut circle. The scotch auger is tuned by a bar or handle placed through the 'eye' at the end of the shank.

PRT No	Size	Cutting Length	Overall Length	PKT QTY	CRTN QTY
ABL1/2CL	1/2"	300mm	600mm	9	36
ABL5/8C	5/8"	300mm	600mm	8	32
